

DRONE TECHNOLOGY

GROUP 50

SOLUTION

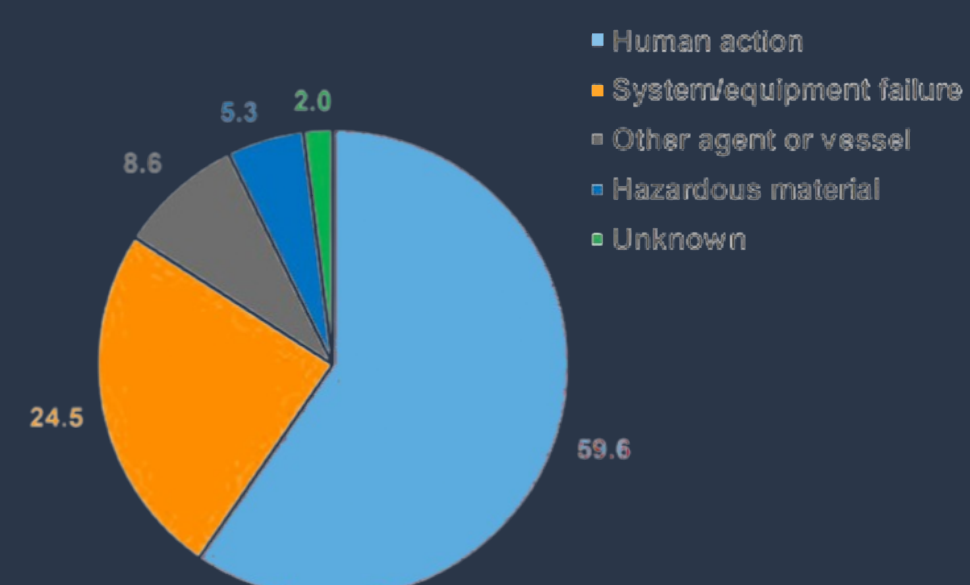

- Automated drone with an integrated AI system, used for vessel inspection and navigation during docking
- A more digitized solution enhancing the operational processes in the maritime industry for Rodhe Nielsen

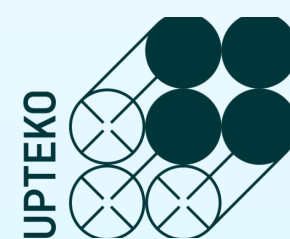

RESEARCH & RESULTS

- The International Maritime Organization's has established aggressive targets for emission reductions by 2030 and 2050
- Digitalization is highlighted as a critical strategy for enhancing ship efficiency in pursuit of these environmental goals

Percentage of accident events
2014--2021

COLLABORATION

- UPTEKO is a danish company, providing innovative robotics technology
- They offer drone technology with specialized applications tailored to meet customer needs
- We anticipate a succesful partnership between Rodhe Nielsen and UPTEKO

LARK™ - BUILT TO ENDURE

DID YOU KNOW?

Drones are used for search and rescue operations at sea.

They cover areas quickly, locates individuals, and even drop life-saving supplies.
